SUMMARY

Motivated and detail-oriented third-year Information Technology undergraduate with a strong interest in software development, web technologies, and IT solutions. Possess good analytical, problem-solving, and teamwork skills developed through academic projects and practical coursework. Eager to apply technical knowledge in a professional environment, gain industry experience, and contribute positively as an intern while continuously learning and developing new skills.

EDUCATION

BSc (Hons) in Information Technology Sri Lanka Institute of Information Technology (SLIIT)	2024 - PRESENT
Pearson BTEC Level 5 HND in Computing Esoft Metro Campus	2022 - 2024
G.C.E Advanced Level - (Physical Science Stream) Maliyadeva College, Kurunegala	2021
G.C.E Ordinary Level Maliyadeva College, Kurunegala	2017

PROJECTS

University Resources Booking System

- Developed UniBrain, a smart campus operations hub for universities using Spring Boot and React. The platform centralizes resource bookings, maintenance ticketing, role-based access control, and real-time notifications, with secure authentication and a RESTful backend.

Technologies: React, Spring Boot, Spring Security (OAuth2, JWT), MySQL, Java

University Clubs & Event Management System

- Built a full-stack University Club and Event Management System that streamlines club administration, event publishing, member management, and student engagement. The project uses Next.js, TypeScript, MongoDB, and Tailwind CSS, with features such as role-based dashboards, club discovery, event workflows, attendance tracking, and an AI-powered assistant for student support.

Technologies: Next.js, TypeScript, Tailwind CSS, MongoDB, Node.js APIs, JWT auth

Online Recyclable Waste Management System

- Built a smart waste management web application that connects users, pickup agents, pickup partners, recyclers, and administrators in one platform. The system supports waste collection, scheduling, role-based dashboards, pricing management, and finance features such as salary calculation and payroll tracking.

Technologies: MERN stack (React, Node/Express, MongoDB) with JWT-secured REST APIs

Online Bidding System

- Developed a web-based online auction platform that enables sellers to list auction items, buyers to place bids, and admins to manage users and auctions. Implemented user authentication, role-based access control, bid validation, and CRUD operations using Java Servlets, MySQL, HTML, Tailwind CSS, and JavaScript.

Technologies: HTML, Tailwind CSS, JavaScript, Java Servlets, MySQL

SKILLS

Backend Development: PHP, NodeJS with Express.js, Java, Kotlin, Spring Boot Framework

Frontend Development: ReactJS, HTML, CSS , Bootstrap, Tailwind CSS

Tools: GitHub, MongoDB, VS Code, Trello, Android Studio

Soft Skills: Project Management, Teamwork, Time Management, Effective Communication

CERTIFICATIONS

MongoDB Python Developer Path - MongoDB University
